

Round 2:

- Due at the guild meeting on January 6, 2010.
- Add the first border to all four sides of the centre square.
- Border will be 2 to 4 inches wide when finished.
- Border must include at least 3 triangles.
- Remember to add seam allowances

A triangle is any 3 sided shape that has 3 corners. Sides do not have to be equal or straight as long as they fit within the border parameters. You can use as many triangles as you like as long as you include at least 3. Remember you can use spacers to make your design fit.
